Barry, Just saw this email and wanted to be sure that you are clear on what we discussed last week. Also that we are looking at Level II not Level I hits in SW.

I really need to finalize the ARR and get it to some of our stakeholders (e.g., BLM and USFS) for review this week, in order for me to be able to give the community our presentation on the 18th. As I have not seen the ARR come through, could you please get it to me as early this week as possible?

Sincerely,

Sabrina Forrest

Subject: Two Animas River Questions

---

1. For the delineation, do we just need the wetlands where there are level 1 results. Can the other wetlands downstream just be noted from the available maps. I would think CSC or Catherine would have an opinion on this. I need to know this to be able to write a proper scope of work for the subcontract. They have openings in late August and early September for this work.

2. I'm changing the background on sediments to the 5-background version of the surface water using the

sediments from the five sample stations. I will not redo the numeric order table for the sediment samples unless you want it to mimic the surface water table and go from most upstream to downstream.

Please let me know at either this email address or [barryhay01@hotmail.com](mailto:barryhay01@hotmail.com)
